## Environmental Sustainability Task Force Implementation

## Progress Report

## September 2025

The following objectives are what staff is pursuing based on the work of the 2021 Environmental Sustainability Task Force. This list of objectives was adopted by the Town Board.

Objective	Responsible Party	Timeline	On Track	Behind Schedule	Hold/ Tabled	Done*	% Complete	Comments
As a component of Development Code, Municipal Code and Building Code review and updates, consider new regulations and/or incentives associated with: wind generators, solar power generation, energy-efficient homes (low flow toillets and showers, appliances, etc.), reduction in gas hook-ups, electric vehicle (EV) infrastructure (for all residential and commercial building types), and requirement for lodging facilities, including short-term rentals, to provide recycling bins.	Steve Careccia	One-Year				<b>~</b>	100%	The Board approved the 2021 IBC codes on May 23rd, 2023, including the Colorado Model Solar Ready and Electric Ready Code. The Town is positioned to take advantage of all helpful building and energy codes to help achive goals.
Incorporate sustainability and resiliency as key themes of the Comprehensive Plan.	Steve Careccia	One-Year				$\checkmark$	100%	Comprehensive Plan is complete, and contains these themes with goals, policies and actions corresponding to each chapter
Evaluate and implement reduced year-round residential electricity rates for offpeak usage (this will be a multi-year effort in collaboration with Platte River Power Authority).	Reuben Bergsten	Multi-Year					60%	The Town Board approved a rate increase at the June 24, 2025 Town Board meeting. Discussion of reduced rates for offper usage is likely to come at a later date in conjunction with discussions with PRPA.
Organize and invest in distributed energy generation and storage (this will be a multi-year effort in collaboration with Platte River Power Authority).	Reuben Bergsten	Multi-Year					Ongoing	The GRIP grant application was submitted, but not awarded. A DOLA grant was awarded to Power and Communications wi Platte River Power Authority as the lead in the purchase and installation of a grid scale battery. This Grid Hardening Grant is currently on hold until there is more certainty around the availability of federal government grant funding.
Consider creation of parking incentives for EVs.	Greg Muhonen (DK)	One-Year					100%	A Study Session was held on June 11th to discuss the Board's guiding policy regarding the relative roles of the Town and the private sector in implementing the Electric Vehicle Infrastructure & Readiness Plan. The Town Board indicated a preference the Town to provide the parking infrastructure nead access to electric infrastructure necessary for a private provider to own a operate the charging stations. A private provider will be selected through a Request for Proposal (RFP) process when the Ticharging data indicates that more electric vehicle charging infrastructure is needed. Management Analyst Simpson has recothis direction in an implementation document for future reference.
Advocate for the installation of additional EV chargers around Town.	Travis Machalek	One-Year				<b>V</b>	100%	Current utilization levels do not support the installation of additional capacity. Management Analyst Simpson has completed implementation document that articulates the Town's approach to installing additional public charging infrastructure.
Plan for implementation of the <u>Colorado Plastic Pollution Reduction Act</u> , which among other things will prohibit stores and retail food establishments from providing singleuse plastic carryout bags at the point of sale.	Jason Damweber	Multi-Year					100%	Internal team met in advance of 2023 to interpret the legislation, identify impacted businesses, develop a system for those businesses to remit their revenues, and ensure those businesses were aware of the new requirements. Outreach was condiahead of 2024, which has more strigent regulations, and is still in process, as businesses are able to use inventoried supplie bags and polystyrene. Informational webpage created. Revenues have continued to be used to purchase reusable grocery broduce bags, reusable silicon bags, and reusable metal cups which have been distributed at various events and locations.
Assist with educational efforts associated with recycling, home energy-saving, and other sustainable practices (such as promoting the use of reusable bags, straws, water bottles, etc.), including sharing information from the County on recycling practices and composting.	Kate Miller	Ongoing					Ongoing	Methods to date: Social media (recycling info from Larimer County), utility bill inserts (general Efficiency Works info and refrigerator recycling), mailers (Efficiency Works contractor recruitment), email subscribers list and social media (new nonreusable bag fees promoting reusable bags). PW Facilities staff continue to partner with Larimer County and the library deliver battery recycling events. The Public Information Office has utilized the Town's portion of the single-use bag fee rever purchase reusable bags and other products to encourage a reduction in waste and single-use plastic, providing these product the community at various Town and partner events and public contact points.
Encourage and support sustainability efforts of the Estes Park Schools and Estes Valley Library.	Travis Machalek	Ongoing					100%	TA Machlek contacted both the School District and the Library District to ask how the Town might be of assistance in suppor sustainability efforts in these organizations. Discussions will continue as opportunities arise.
Prepare an effectiveness report as outlined in the <u>Complete Streets Policy</u> (which would include the number of projects completed, number of projects incorporating complete streets infrastructure, actual infrastructure added, number of transit and non-motorized users, and community attitudes and perceptions).	Greg Muhonen (JB)	One-Year				<b>V</b>	100%	The effectiveness report for 2023 was prepared and presented to TAB in January 2024.
Discontinue purchasing of bottled water using Town funds.	Duane Hudson	One-Year					100%	Directives have been issued throughout the town to discontinue the purchasing of bottled water for town functions. We will evaluate working this prohibition into our purchasing policies moving forward. A purchasing policy prohibition on purchasing bottled water will be considered when the Town updates our purchasing policies.
Provide more recycling bins in Town facilities, especially where there are larger gatherings of the public (such as the Visitor Center and Event Center).	Greg Muhonen (RS)	One-Year					100%	Five bins installed in Town Hall December 2022. Four additional bins installed at Trail Blazer office, Visitor Center, Museum Events Complex.
Create zero-waste guidelines for event organizers holding an event on Town property, and work with private groups and event venues to implement zerowaste practices into their own activities.	Rob Hinkle	One-Year					Ongoing	Scraps LLC provided services (recycle, compost and trash) for the 2024 Big Foot Days event in Bond Park. Staff is evaluati results from this event in order to decide how to approach future events. The Town was also awarded a Front Range Waste Diversion Mini Grant of \$45,398 to purchase 4 water fill stations, 5 three stream waste cans and 1 storage container. These items have been purchased and were delivered in 2024.
Continue to work with partners (Fire District, Larimer County, Boulder County, Watershed Coalition) to promote yard debris and slash removal and management that does not involve the landfill.	Jason Damweber	Ongoing					Ongoing	Staff coordinated initial meetings about the Meeker Sort Yard with representatives of the Fire District, Larimer County, and Boulder County in 2023; it was determined that the likelihood of creating our own local slash/sort yard is unlikely due to high costs. Discussions will be ongoing and included in larger conversations about solid waste management tha primer County Trustee Lancaster reached out to Boulder County in September 2024 and confirmed there are no plans to require Boulder Cresidency to use the yard for the foreseeable future. Ongoing discussions about management of woody biomass are occurifications are confirmed the county level.
Monitor the old Estes Park landfill at Moraine Avenue and Elm Road for methane emission and research the feasibility of capturing methane gas for energy use.	Paul Fetherston	Ongoing					100%	Stewart Environmental has been retained to prepare and submit this report annually to CDPHE.
Install additional water refill stations in Town facilities.	Paul Fetherston	One-Year					100%	Installation completed at Town Hall, PD, Museum, Broadband office, Decker Electric shop, Water shop, Visitor Center and I Center. Exterior fill stations to be included during remodeling. No plans to equip Performance Park or Elkhorn outside fill stations. Cost is \$8,500 each.
Continue staff participation and involvement in Climate Smart Larimer County efforts.	Jason Damweber	Ongoing	0				100%	Town staff is currently serving on the Climate Smart Future Ready (CSFR) Executive Committee. Staff will continue to participation in the group as long as it exists. The plan has entered its implementation phase, which can be tracked through County's interactive dashboard.
Consider "green fleet and equipment" policy, where internal combustion engine vehicles and equipment are replaced with "greener" options as they are replaced.	Jason Damweber	Ongoing					100%	Several departments and divisions, including Parks, Streets, Mobility Services, PD and Power & Communications are all e actively using and/or exploring alternative-fueled vehicles and equipment. Parks replaced hand tools with electric versions 2025. This will be further discussed during the development of the Climate Action Plan later in 2025 and into 2026. Marking complete since the strategic plan item related to the Climate Action Plan will encompass this.
